One Garden Divine Flower and Nature Essences

inspire, encourage, guide, educate, support and cultivate your desire to emotionally resolve the childhood soul injuries and error-based use of will that are causing your pain and suffering. For it is the soul injures that block experiences of love, truth, joy and soul growth – physically, emotionally, mentally and spiritually.

One Garden Essences acknowledge and respect your free will to choose your responses.

To use this guide, One Garden Essences encourage you to examine your feelings, impressions and reactions (positive or negative) when you connect to the **name of the essence, and descriptive words**.

As you read about and “feel” into each essence, it will automatically connect/trigger a recognition within your soul and offer an emotional response/reaction indicating an issue requiring your attention.

This is more of a feeling process rather than a mental one because *feeling is healing* and gives you more truthful indication at the soul level.
